Comprehension:

Read the passage and answer the questions given below:

The 2004 earthquake and tsunami in Banda Aceh, Indonesia, stunned the world. It killed over 230,000 people, and caused damage as far away as Africa. Less than a year later, an earthquake in Pakistan killed 80,000 people. Earthquakes are sudden movements in the earth's crust that occur along faults (planes of weakness), where one rock mass slides past another one. When movement along faults occurs gradually and relatively smoothly, it is called creep or seismic slip and may be undetectable to the casual observer. When friction prevents rocks from slipping easily, stress builds up until it is finally released with a sudden jerk. The point on a fault at which the first movement occurs during an earth-quake is called the epicenter.

Earthquakes have always seemed mysterious, sudden, and violent, coming without warning and leaving ruined cities and dislocated landscapes in their wake. Cities such as Kobe, Japan or Mexico City, parts of which are built on soft landfill or poorly consolidated soil, usually suffer the greatest damage from earthquakes. Water-saturated soil can liquify when shaken. Buildings sometimes sink out of sight or fall down like a row of dominoes under these conditions.

SubQuestion No : 46

Q.46

Main cause of earthquakes can be considered as:

1. Volcanic eruptions
2. Sudden movements in the earth's crust along faults
3. Flood
4. Extreme weather conditions

Comprehension:

Read the following passage carefully, and answer the questions.

Scientific management is a theory of management that analyzes and synthesizes workflows. Its main objective is improving economic efficiency, especially labor productivity. It was one of the earliest attempts to apply science of engineering processes to management. Scientific Management is also known as Taylorism after its pioneer, Frederick Winslow Taylor.

Taylor began the theory's development in the the United states during the 1880s and 1890s within manufacturing industries, especially steel. Its peak of influence came in the 1910s. Although Taylor died in 1915, by the 1920s scientific management was still influential but had entered into competition and syncretism with opposing or complementary ideas.

The Midvale Steel Company, "one of America's great armor plate making plants," was the birthplace of scientific management. In 1877, Frederick W. Taylor started as a clerk in Midvale, but advanced to foreman in 1880. As foreman, Taylor was constantly impressed by the failure of team members to produce more than about one-third of what he deemed a good day's work. Taylor determined to discover, by scientific methods, how long it should take men to perform each given piece of work; and it was in the fall of 1882 that he started to put the first features of scientific management into operation. Although scientific management as a distinct theory or school of thought was obsolete by the 1930s, most of its themes are still important parts of industrial engineering and management today.

Question ID : **3767495561**

Option 1 ID : **37674921669**

Option 2 ID : **37674921670**

Option 3 ID : **37674921671**

Option 4 ID : **37674921672**

Status : **Answered**

Chosen Option : **4**

Comprehension:

Read the following passage carefully, and answer the questions.

Securities and Exchange Board of India (SEBI) in 1999 set up a committee under Shri Kumar Mangalam Birla, member SEBI Board, to promote and raise the standards of good corporate governance. The primary objective of the committee was to view corporate governance from the perspective of the investors and shareholders and to prepare a 'Code' to suit the Indian corporate environment.

The mandatory recommendations apply to the listed companies with paid up share capital of Rs. 3 crore and above. The composition of board of directors should be a combination of executive and non-executive directors. Audit committee should contain 3 independent directors with one having financial and accounting knowledge. The Board should hold at least 4 meetings in a year with a maximum gap of 4 months between 2 meetings to review operational plans, capital budgets, quarterly results, minutes of committee's meeting. The director shall not be member of more than 10 committee and shall not act as chairman of more than 5 committees across all companies.

The non-mandatory recommendations were to apply to all the listed private and public sector companies, their directors, management, employees and professionals associated with such companies. The committee recognizes that compliance with the recommendations would involve restructuring the existing boards of companies. It also recognizes that smaller ones will have difficulty in immediately complying with these conditions.

SubQuestion No : 146

Q.146 Which one of the following is not a part of mandatory recommendations?

1. Audit committee should contain 3 independent directors with one having financial and accounting knowledge
